EDUCATION

Basis Shavano <i>Senior - 4.0 GPA, 1500 PSAT, 1550 SAT</i>	San Antonio, TX 2018 – 2026
Georgia Institute of Technology <i>Computer Science & Physics</i>	Atlanta, GA 2026 – 2030

EXPERIENCE

Research <i>Princeton Laboratory for Intelligent Probabilistic Systems</i> Studying score-based generative modeling with physical computing, advised by Dr. Cyrill Bosch	April 2026 – Present <i>Remote</i>
Research <i>UT Health Greehey CCRI</i> - Conducting research on RAD51 AP1 for my final semester of high school, earning honors diploma - Carried out small scale test set expression, PCR, D-loop assays, and other protein purification protocols	March – May 2026 <i>San Antonio, TX</i>
Full-stack Software Engineer <i>Veritrade</i> - Accepted through cold-email and technical interview - Shipped UI redesign, SEO optimization, Email Blacklisting, and Broker connections - Vite + NextJS	January – June 2026 <i>Remote</i>
Research Mentorship Program <i>UC Santa Barbara</i> - Competitive program with 2.5% acceptance rate globally and awarded a full ride of \$12,400 - Built Bayesian Optimization models to optimize the Second Harmonic Generation of Gallium Nitride, using quantum wells and exploiting subatomic physical properties to increase power transmission - Presented to 100+ at symposium and achieved near state-of-the-art results	June – August 2025 <i>Santa Barbara, CA</i>
Research <i>UT Health, Veterans Affair Building</i> - Machine Learning (Linear Regression, GAMs, and Random Forest) in R to find novel micro-RNA biomarkers of Immune Resilience in multi-omic GEO Datasets and the Framingham Heart Study - Found two novel microRNA biomarkers and won Best Use of Statistics at regional science fair	August 2024 – April 2025 <i>San Antonio, TX</i>
Research <i>University of Texas at Dallas, AI Safety Lab</i> - Accepted to Dr. Feng Chen's Lab and worked with 5 other interns on a deep learning model for 3D object detection using camera & LiDAR data - published our research paper - Built & tuned 3D object detection head and conducted literature review to find new model architectures	June – August 2024 <i>Dallas, TX</i>
Founder & CEO of Crunch Math Crunch Math - Helped 1000+ K-12 students through free online programs and reached 130,000+ on YouTube - Grew low-cost private tutoring to \$3000+ in revenue - Teamed up with 6 schools, acquired a grant from Tutoring for Tomorrow, fiscally sponsored by HackClub	January 2023 – June 2026 <i>San Antonio, TX</i>

AWARDS

Jack Kent Cooke Finalist - top 0.9% nationally for full-ride merit-based scholarship	2026
NMSQT Finalist - \$2,500 Scholarship for top 1% of PSAT scorers nationally	2026
Boy Scouts - Eagle Scout	2026
2-time AIME qualifier - top 5% of national scorers on AMC 10/12 exam	2024 & 2025
